weeklies/websec

Wot dis

1st Hour - Intro + Wargames

2nd Hour - XSS & SQLi

3rd Hour - Whatever

Play along

Slides and all available at shittyctf.xyz/slides

Feel free to look at any all of these resources, they're pretty cool for web stuff.

websec/wot_is_web

wot_is_web

- World wide web is less syllables than 'www'.
- Business school students think they can make websites
- Follow youtube guides, and make a dank wordpress blog on wordpress 1.5.
-

Announcing WordPress 1.5

Posted February 17, 2005 by Matt Mullenweg. Filed under Releases.

But_whai

- This means their websites are typically shit.
- Soz no pics.

- But how?
- XSS
- Shell Injection
- Insecure Object Referencing
- SQLi

Where do i learn dese things

- Here
- Interwebs
- wargames.

websec/wargames

Wot r wargames

- Hacking 'games'
- Hosted 24/7 by people we don't know
- Fun if you have too much time
- Plenty of writeups available
    - Plenty of help in #Internet-Relay-Cats

overthewire

- overthewire.org/
- Has lots of different types
- Natas is web
- You may have tried some.
- Dis be gud now to learn and ask.

hackthissite

- hackthissite.org/
- Prettycool
- Has a variety of challenges w/ hints
- Good to work on
- Rego takes forever (couldn't get it done in the 5minutes i spent doing this slidedeck)

websec/XSS_SQLi

Play along

Slides and all available at shittyctf.xyz/slides

There are 3 challenges i've made so far. Might put up more as the event goes on if I have time to code some up.
